[0021] A particular limitation of applying translucency to windows is that some windows may become so transparent that the window is no longer visible. For example, U.S. patent application Ser. No. 10/059,088 ~~_____ (Attorney Docket No. AUS920010516US1)~~ describes adjusting the transparency of a window to reflect the resource usage associated with the window, sometimes leaving a window completely transparent and thus seemingly unavailable to the user.
